

Dr Dahdouh teaches at ULB ( Université Libre de Bruxelles ). With the help of PHD candidate Giovanna Wolswijk they help Blue Mangrove on the scientific side of our work.

Their knowledge in Mangrove Plantation, CO2 capture optimization, as well as their wholistic approach where they include the local social and eco system in the plantation solution for long term results is in line with Blue Mangrove and Friendship approach.

A student call for thesis is proposed and would be under their supervision

ERASMUS MUNDUS JOINT MASTER DEGREE IN TROPICAL BIODIVERSITY AND ECOSYSTEMS
